DESIGNING WINDOWS FOR THE WAY WE LIVE TODAY

1. Utility - Comfort

Windows designed for effortless everyday living.

- Smooth operation
- Optimal ventilation
- Thoughtful sizing
- Seamless usability

2. Strength - Necessity

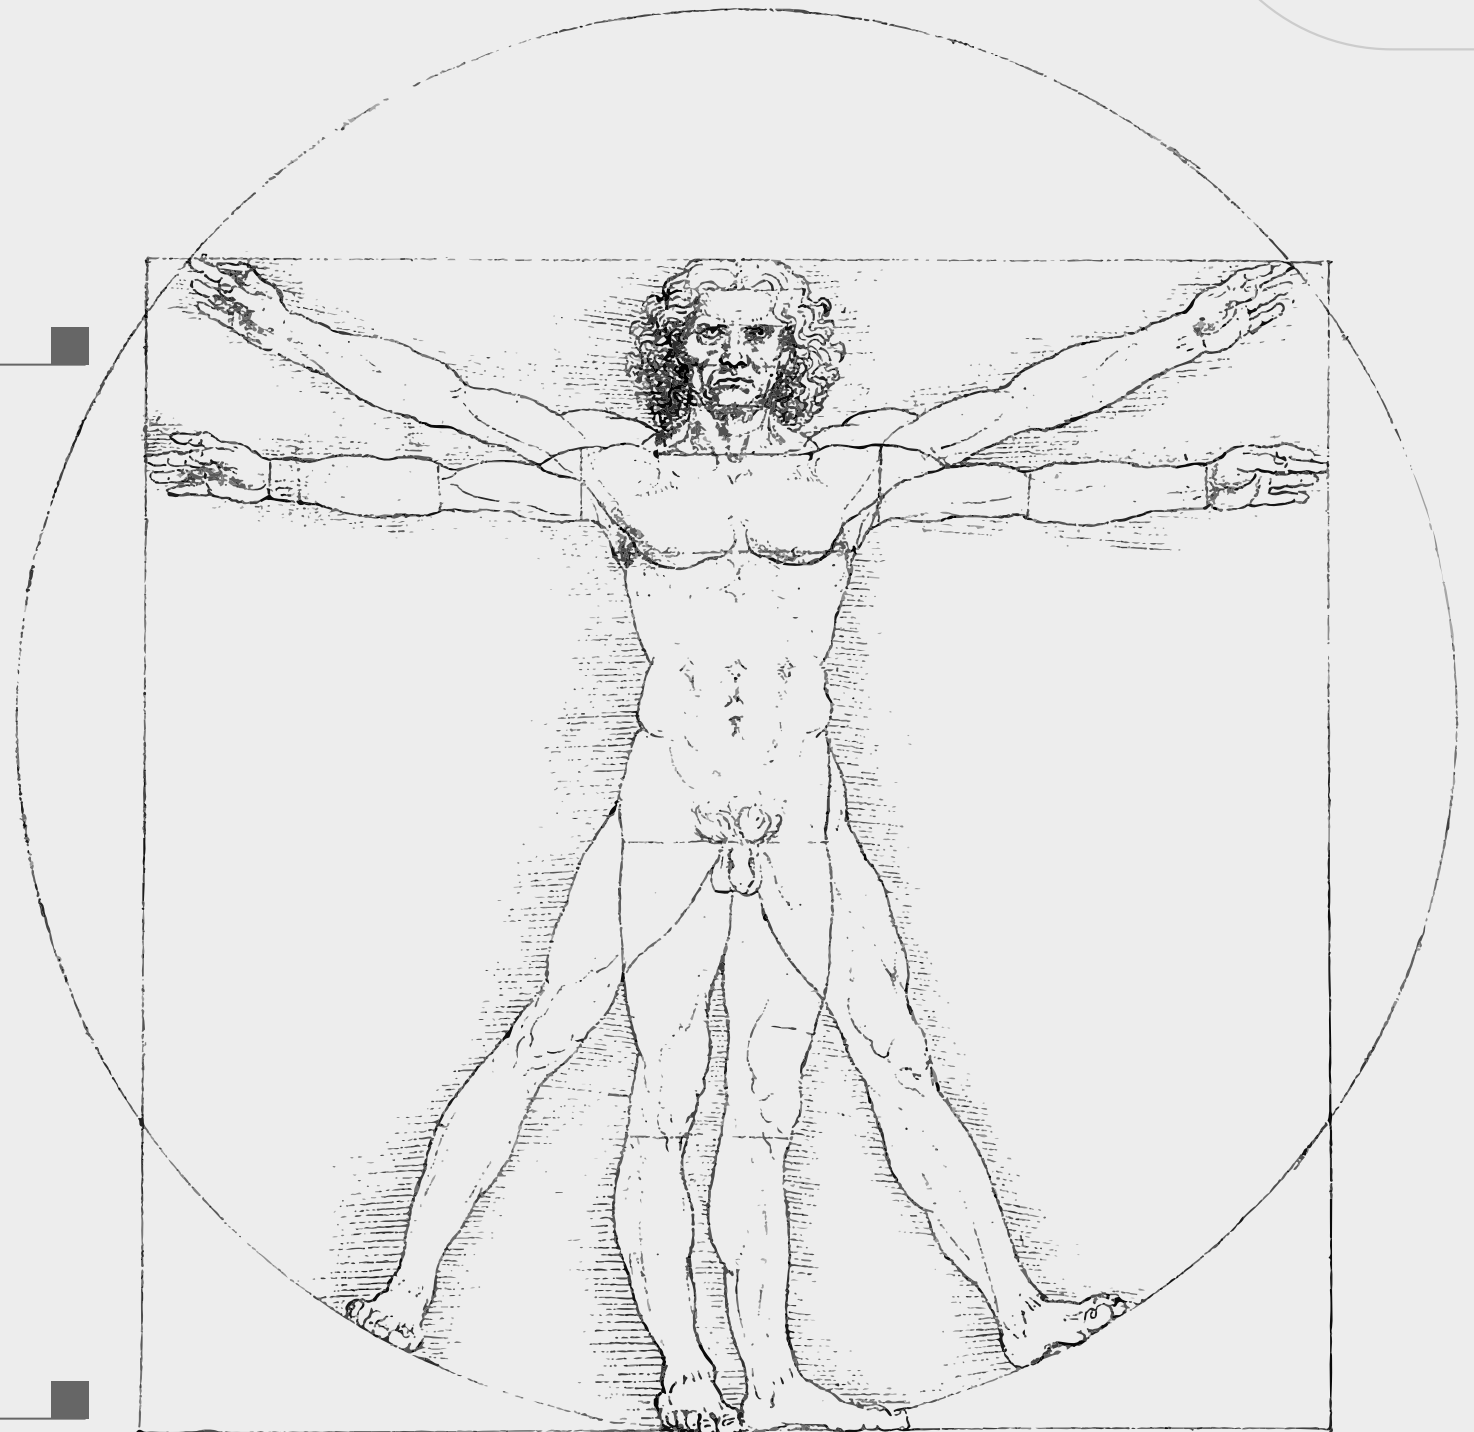

Built to perform without compromise.

- Structural integrity
- Weather resistance
- Acoustic & thermal performance
- Long-term durability
- Smart add-ons that matter

3. Beauty - Delight

Minimal design that enhances the space.

- Clean profiles
- Slim frames
- Modern aesthetics
- Designed to elevate spaces

INTRODUCTION

At Arcline, our philosophy is rooted in the **Vitruvian Trilogy**—the timeless architectural harmony of **Utilitas, Firmitas, and Venustas**. Window design begins with **Utility (Utilitas)**. Every window is created to serve daily life with ease, allowing light, air, and movement to flow naturally within a space. Thoughtful proportions, smooth operation, and functional clarity ensure that windows feel intuitive and comfortable, becoming an effortless part of everyday living.

Equally important is **Strength (Firmitas)**. Windows must perform reliably under real conditions—facing weather, time, and continuous use. **Arcline focuses on structural integrity, durability, and performance-led engineering** to deliver systems that provide protection, efficiency, and long-term dependability. Strength is treated not as an enhancement, but as a fundamental requirement.

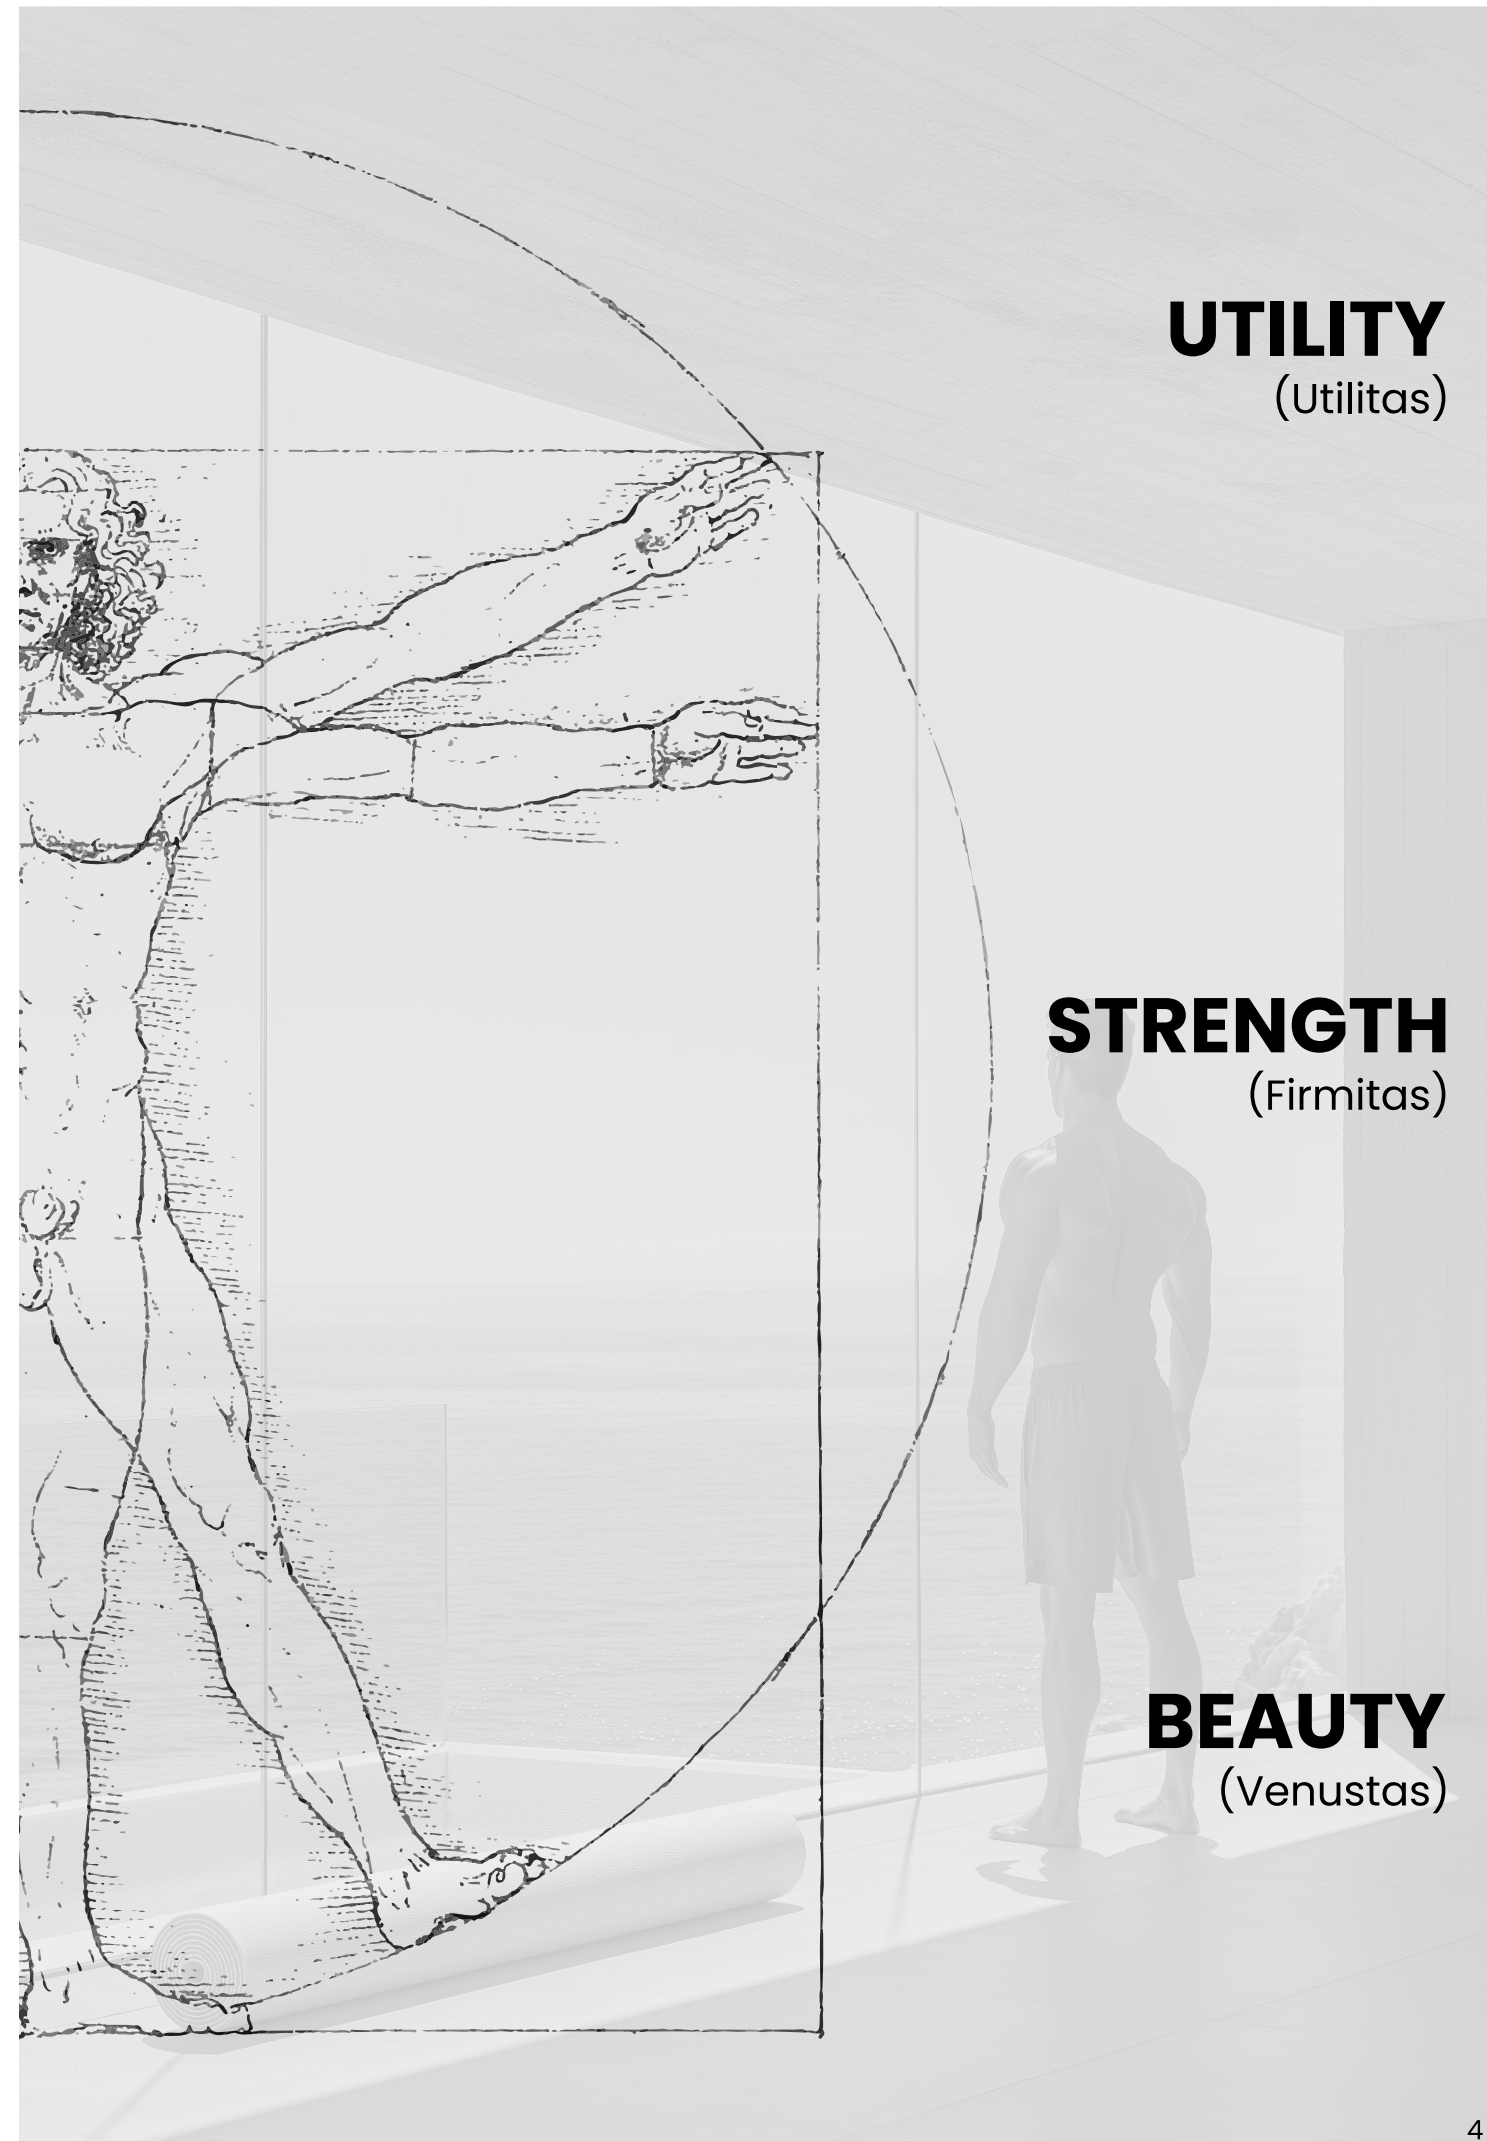

Completing this balance is **Beauty (Venustas)**. Clean lines, minimal profiles, and refined detailing define Arcline's design language. Rather than dominating architecture, the windows complement it, enhancing spaces with a quiet, timeless aesthetic. Beauty, at Arcline, is achieved through precision and restraint.

Together, these three pillars form the foundation of Arcline's approach—creating window solutions that are practical, reliable, and visually harmonious, designed for the way we live today.

ARCLINE

ENGINEERING LEGACIES.
FRAMING PERSPECTIVES.

ABOUT US

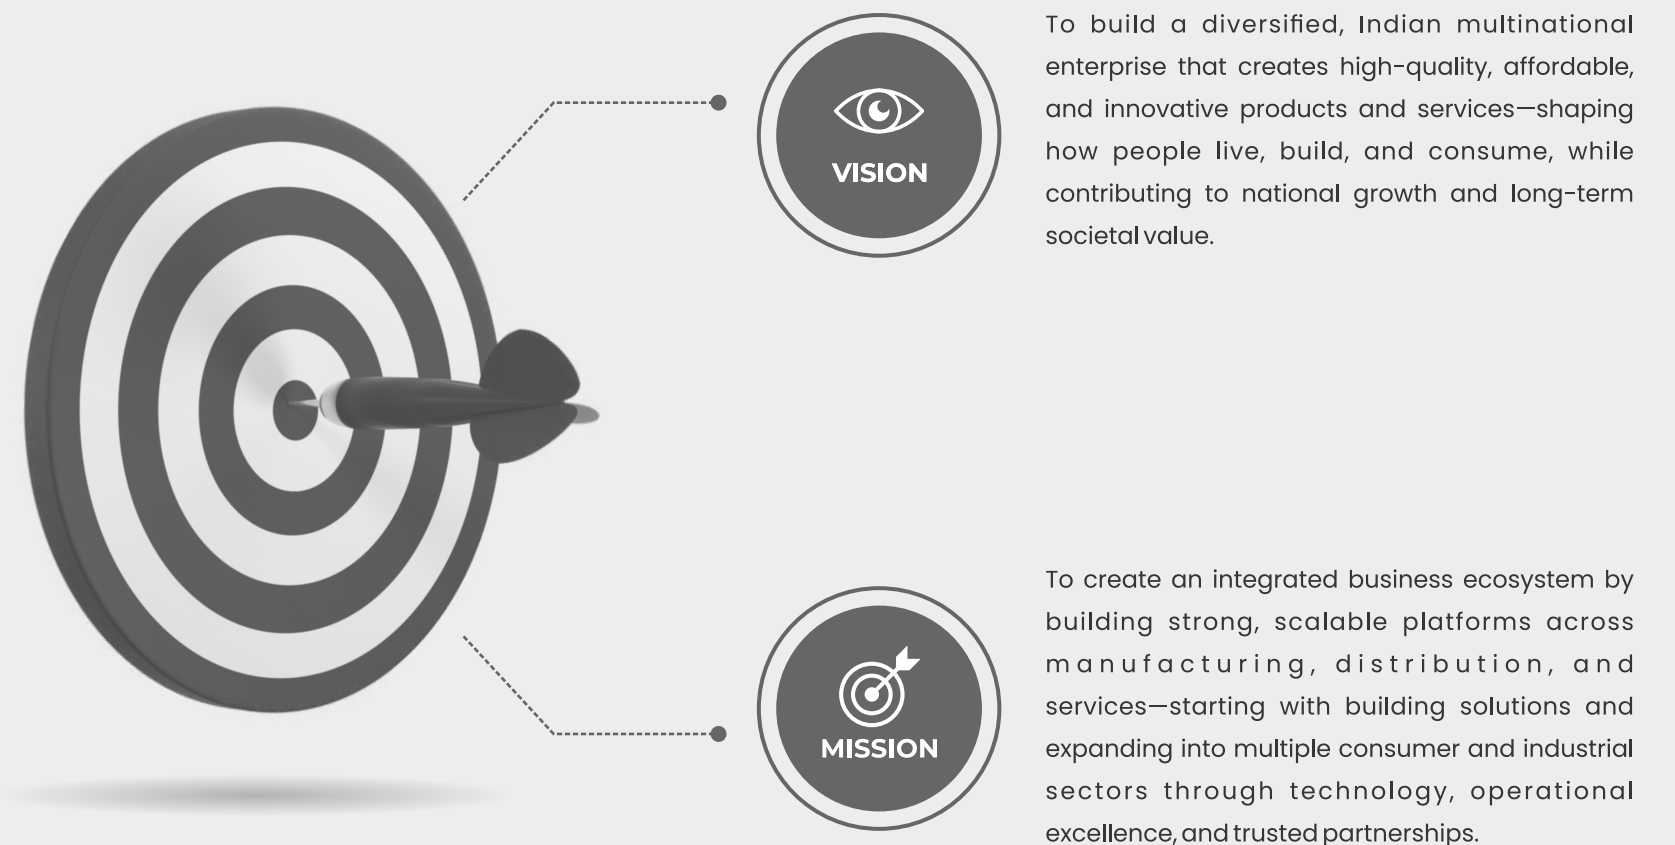

A Century-Long Craftsmanship For over ten decades, our family has spoken the language of wood and structure. What began as a humble carpentry practice a century ago has evolved into Arcline—a legacy of precision that spans generations. We don't just build; we inherit the responsibility of excellence.

From Apprentice to Visionary Our expertise is rooted in the "dust of the workshop." Our journey from a hands-on trainee to a master manufacturer ensures that your project is overseen by someone who has mastered every joint, seal, and frame. This isn't just business; it is a life's work. When you choose Arcline, you aren't just buying a window; you are investing in a century of technical intuition that leaves no room for doubt.

Our team at Arcline is comprised of **dedicated specialists** who **blend technical precision** with a deep understanding of modern architectural needs. By combining decades of engineering expertise with a passion for refined design, we ensure every window system is crafted to the highest standards of performance and reliability.

OUR CORE VALUES

Built on Trust We believe that a masterpiece is only complete when it earns a smile. At Arcline, **100% customer satisfaction** is our only metric of success. We take immense pride in the fact that our finest work is found in the homes of those who were referred to us by our past clients. Your trust is our most valuable heritage.

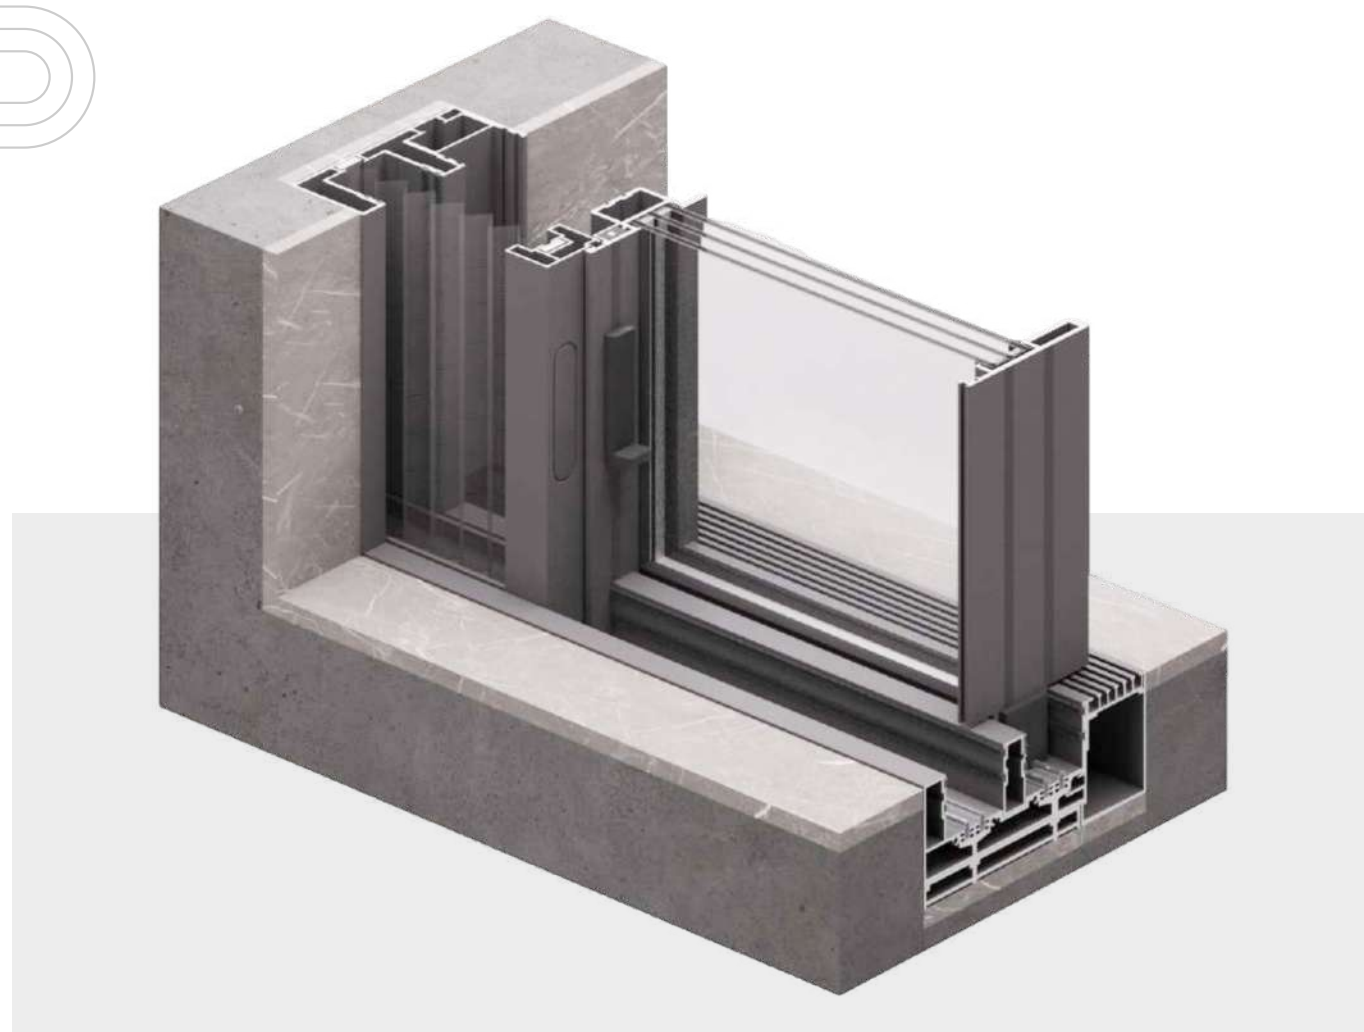

ARC IMPERIAL SLIM SYSTEM

ARC IMPERIAL SLIM SYSTEM

The Zenith of Design: Invisible Frames for Panoramic Living

PRODUCT INTRODUCTION

Elevate your architectural vision with the Imperial Slim series—a system designed for the true *connoisseur*. By seamlessly integrating the precision-engineered structure into the building’s fabric, we have achieved a revolutionary "invisible frame" aesthetic. This creates a boundless expanse of glass, inviting the horizon into your living space without a single visual obstruction.

- **Exceptional Craftsmanship:** Built from premium-grade materials for a lifetime of silent, effortless operation.
- **Minimalist Luxury:** A statement in sophisticated design that prioritizes light and openness.
- **Uncompromising Safety:** High-performance multi-locking systems ensure extreme security.

Sound insulation

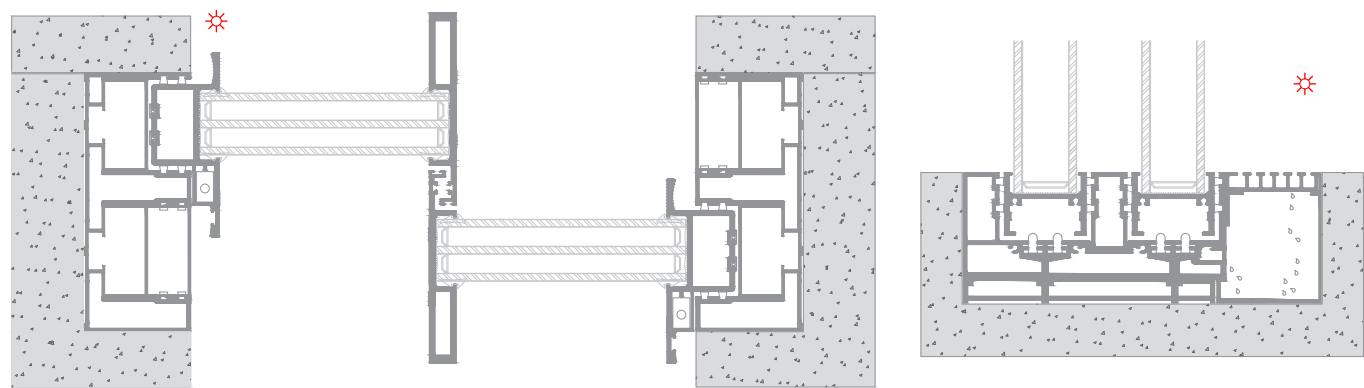

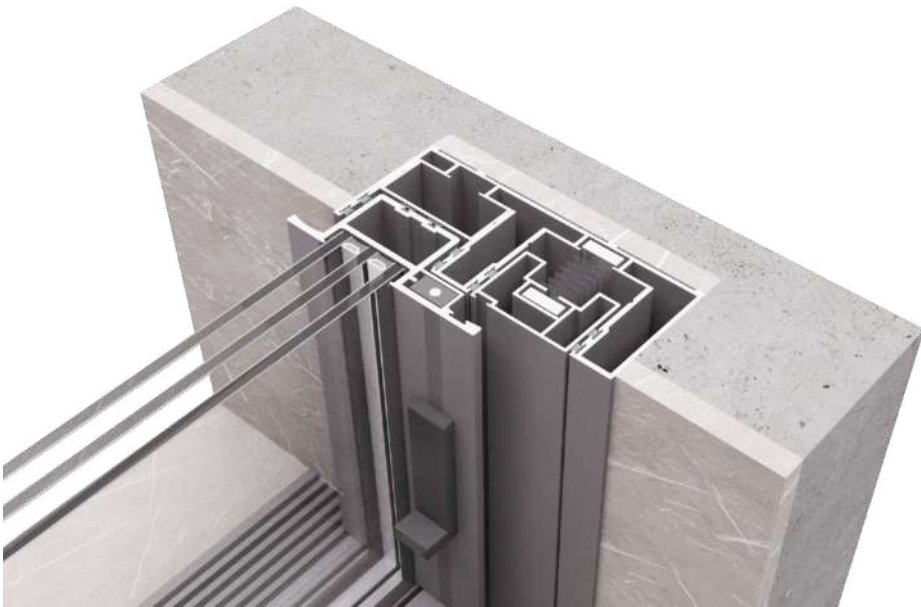

Water tightness

Wind load

Color choice

Impact resistance

10 years warranty

TECHNICAL SPECIFICATIONS

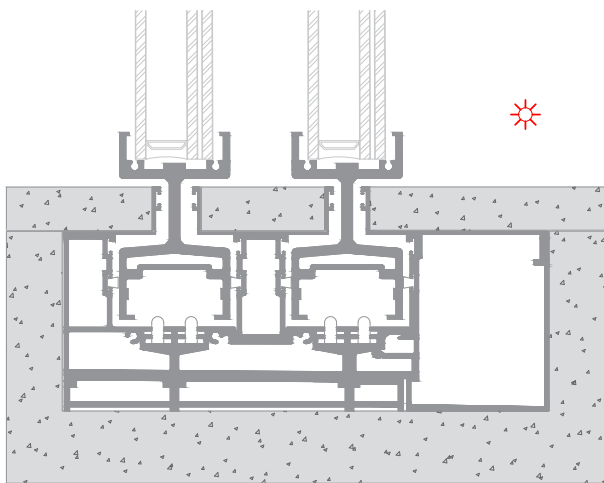

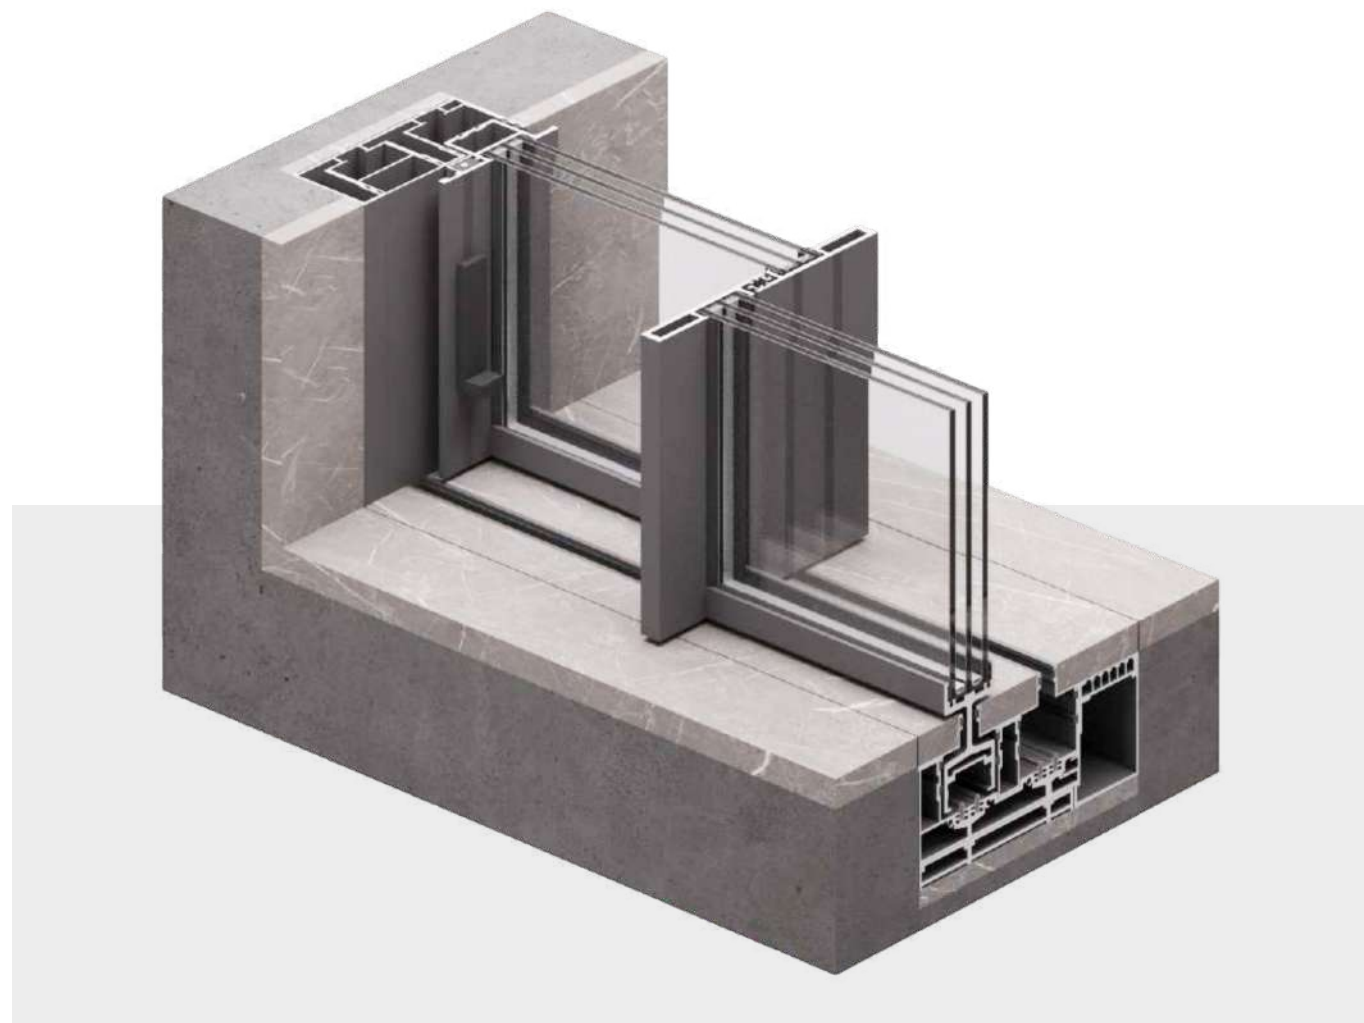

Feature	Specification
Track Frame Width / Height	164 mm / 68 mm
Interlock Sightline	Ultra-slim 17 mm
Glass Compatibility	20 mm to 38 mm
Max Shutter Dimensions	6000 mm (H) x 3500 mm (W)
Locking Mechanism	Multi-point (Top & Bottom)
Integrated Features	Pleated Mosquito Net
Load & Wind Resistance	500 kg Roller Cap / 3.8 KPA Wind Load

ARC IMPERIAL SLIM SS2 (ALL-WAY CONCEALED)

PRODUCT INTRODUCTION

The ultimate expression of "less is more." This variant hides the entire frame and track within the walls, creating a stunning frameless pocket door effect.

- **Technical Highlights:** 225 mm Track Width, 105 mm Track Height, 17 mm Sightline. (No Mosquito Net).

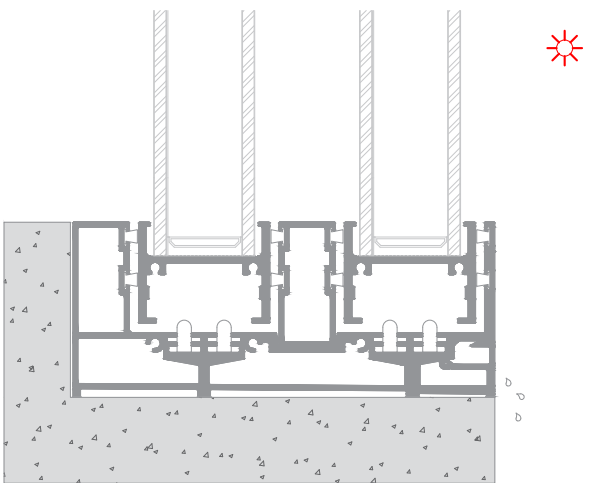

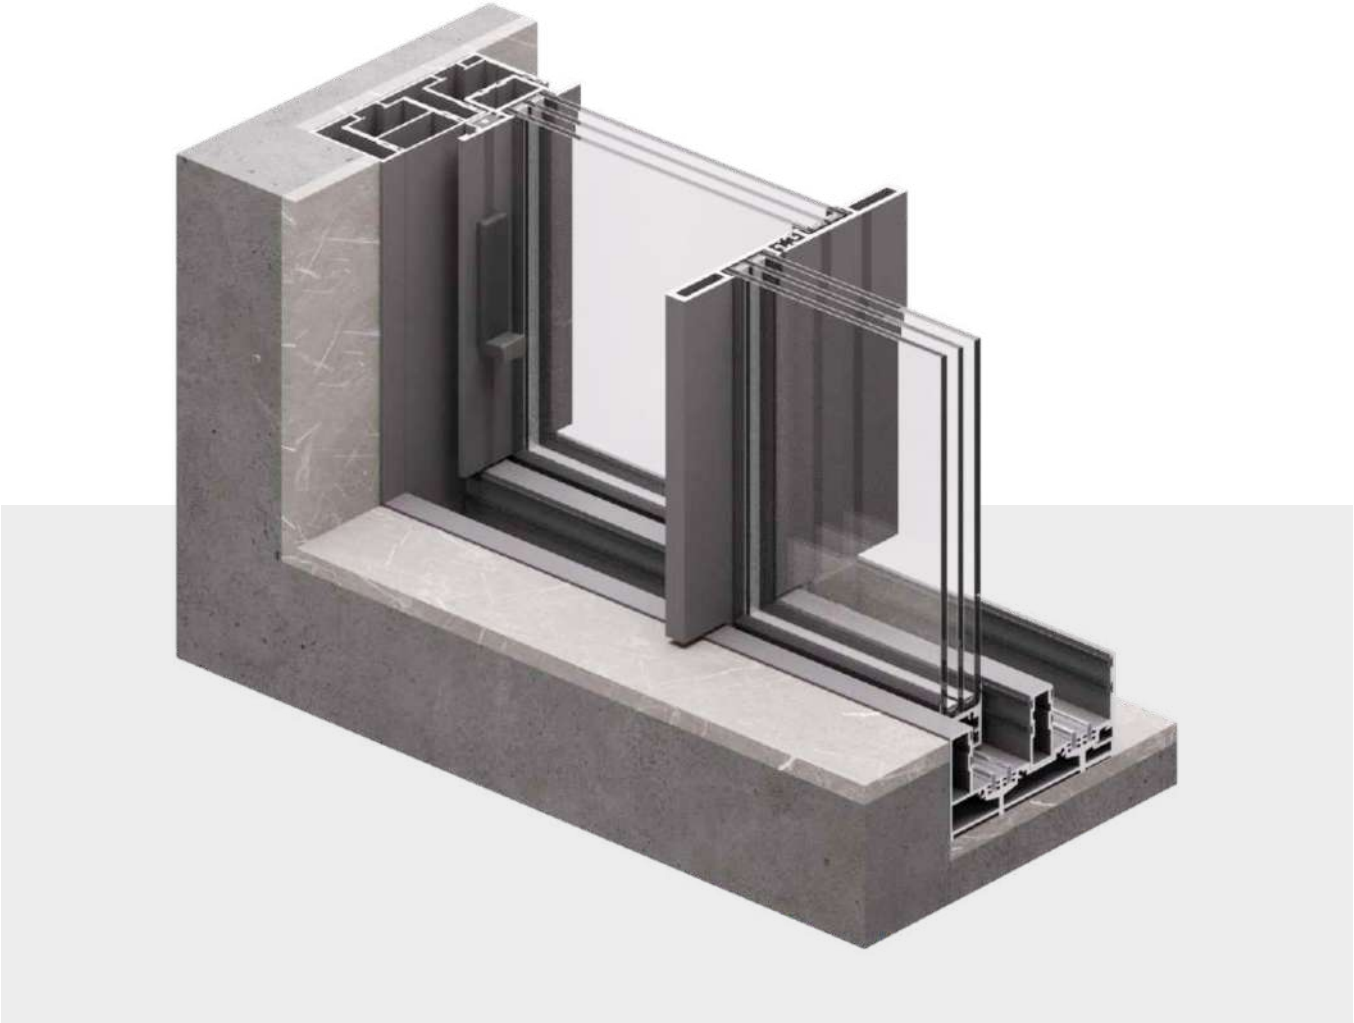

ARC IMPERIAL SLIM SS3 (ONE-SIDE CONCEALED)

PRODUCT INTRODUCTION

Designed to create a "floating panel" illusion by concealing the frame on one side, maximizing light for a contemporary, sharp aesthetic.

- **Technical Highlights:** 164 mm Track Width, 68 mm Track Height, 17 mm Sightline. (No Mosquito Net).

HORIZON L-VIEW

Emphasizes the wide, panoramic perspective.

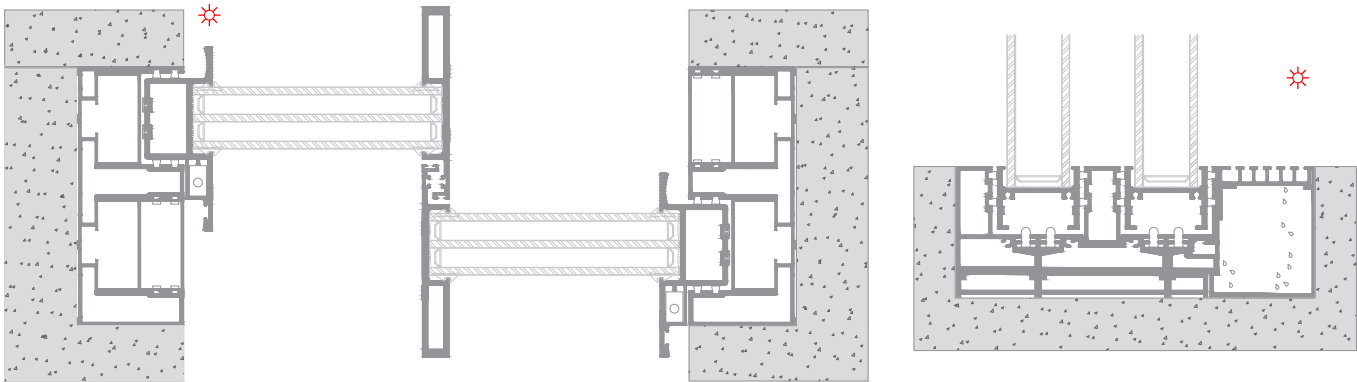

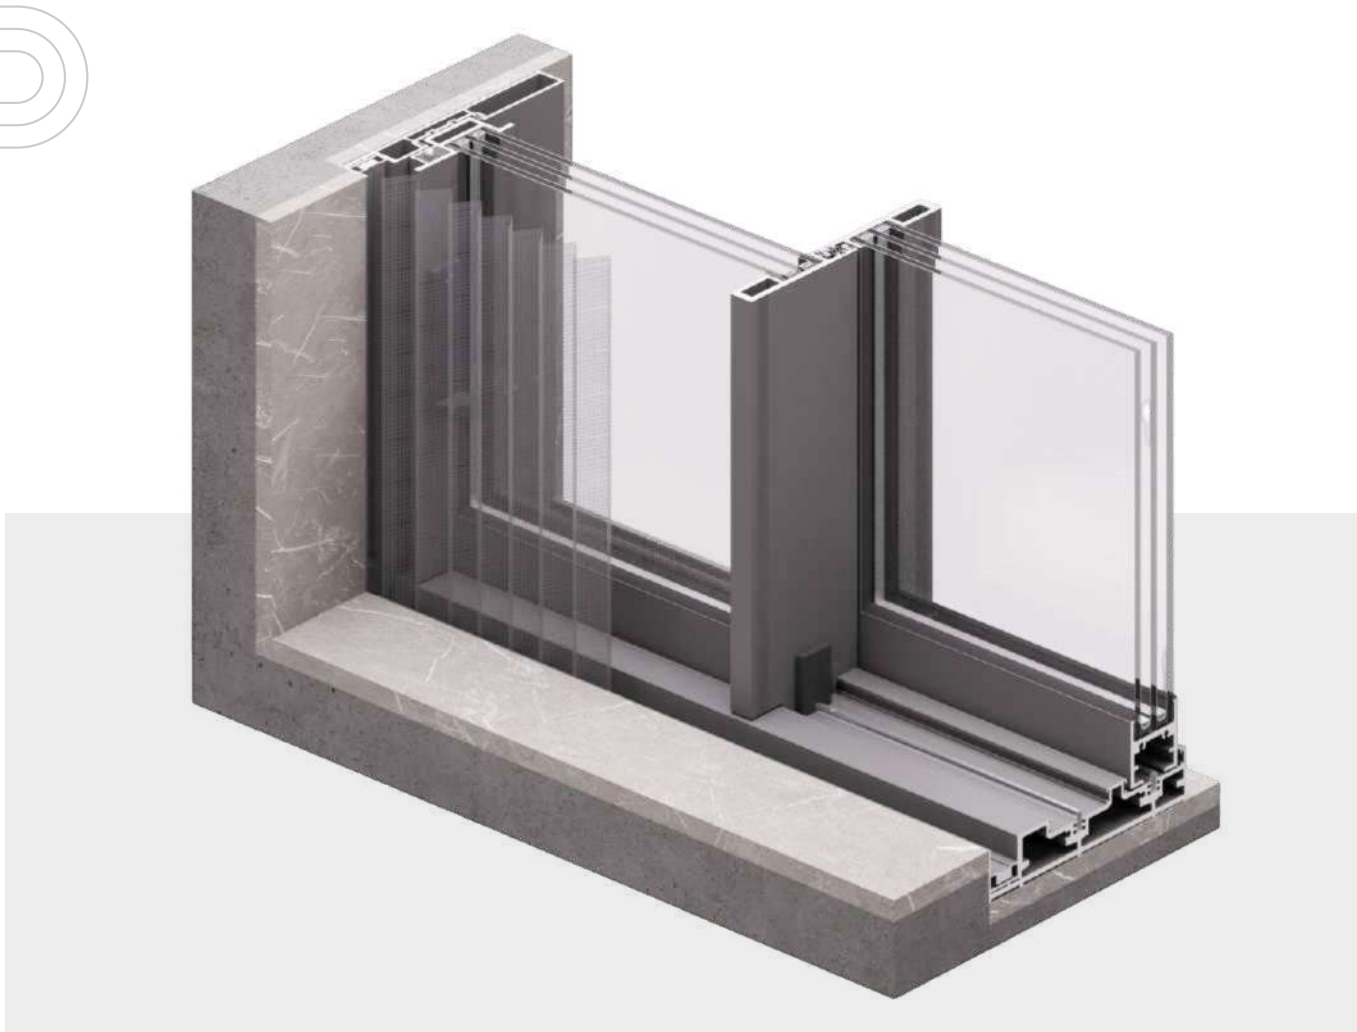

ARC VISTA SLIM SYSTEM

ARC VISTA SLIM SYSTEM

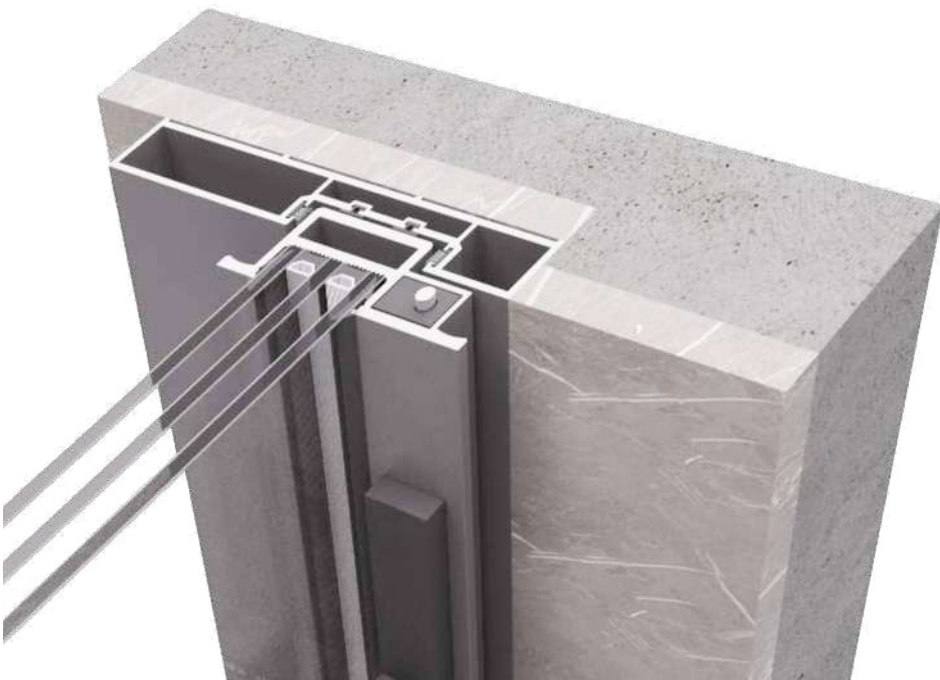

Where Visionary Architecture Meets Bespoke Luxury

PRODUCT INTRODUCTION

The ARC Vista Slim is a curated solution for elite global projects. Engineered with the slimmest possible sightlines, this system blurs the boundary between indoor sanctuary and the grandeur of the outdoors. It is more than a window; it is a crystal-clear canvas of light.

- Sound insulation
- Water tightness
- Wind load
- Color choice
- Impact resistance
- 10 years warranty

TECHNICAL SPECIFICATIONS

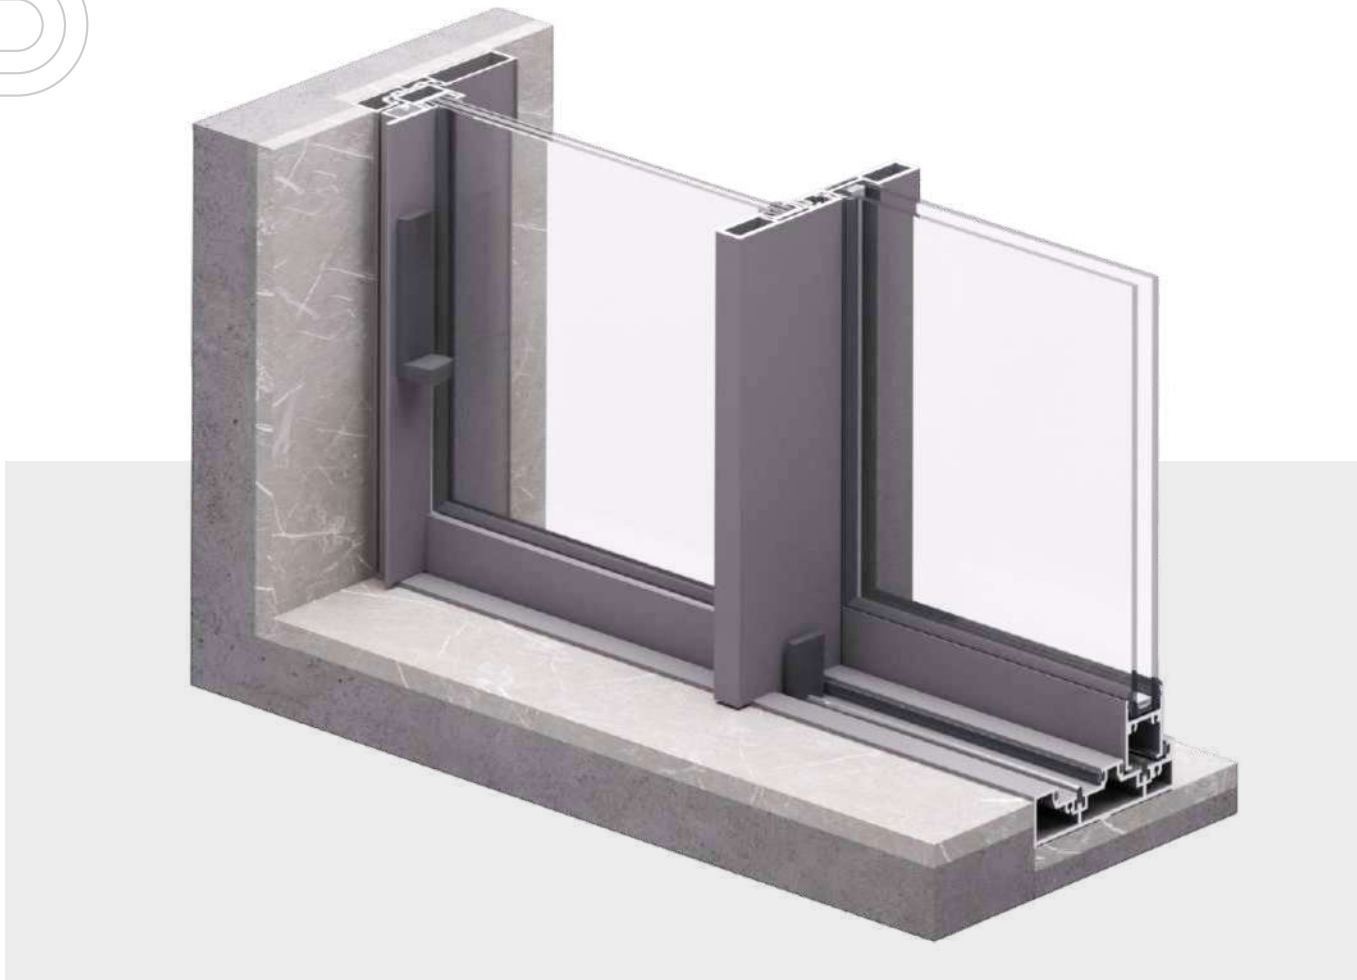

Feature	Specification
Track Frame Width	2 Track: 150 mm / 3 Track: 217 mm
Track Frame Height	31 mm
Glass Thickness	12 mm to 32 mm
Max Shutter Dimensions	4500 mm (H) x 3000 mm (W)
Roller / Wind Capacity	300 kg / 2.8 KPA

ARC ULTRA SLIM SYSTEM

ARC ULTRA SLIM SYSTEM

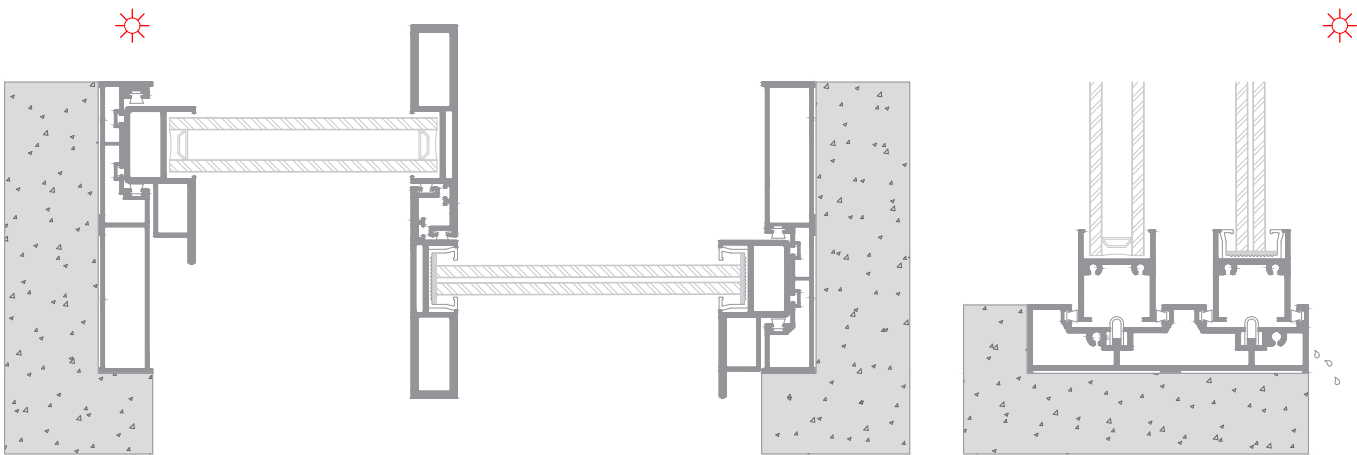

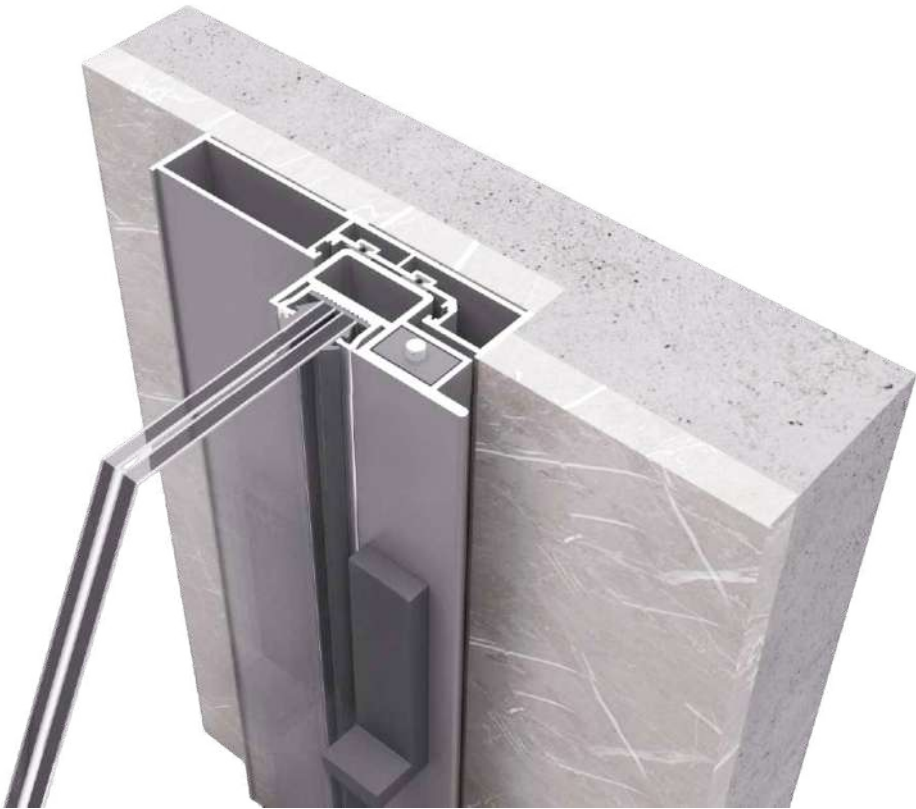

Redefining Transparency for Modern Minimalism

PRODUCT INTRODUCTION

The ARC Ultra Slim system represents the cutting edge of architectural brilliance. With profiles so narrow they virtually vanish, this system is the premier choice for avant-garde designs and contemporary homes. It offers an unprecedented influx of natural light and panoramic clarity.

- Sound insulation
- Water tightness
- Wind load

ARC 2560 PARTITION SYSTEM

ARC 2560 PARTITION SYSTEM

Intelligent Space Management for Professionals

PRODUCT INTRODUCTION

The ARC 2560 system offers a sophisticated way to define interior spaces without sacrificing light or sound insulation. Ideal for corporate offices and luxury banquet halls, this system features "snap-fit" sections for rapid installation and reconfiguration without damaging floors or ceilings.

- **Versatility:** Compatible with glass, wood, or aluminium panels.
- **Acoustics:** Designed for high-level sound attenuation.
- **Sustainability:** Easy to dismantle and re-install with minimal waste.

THE EVOLUTION OF SPACE

The era of heavy, opaque partitions is over. Today, interior boundaries are no longer just functional dividers—they are essential design elements that define the character of a room.

As the demand for transparency and architectural fluidity grows, **Arcline** emerges as the definitive solution. Bridging the gap between structural necessity and aesthetic grace, this slim glass partition system is engineered for the modern minimalist. It offers the sophisticated look your space deserves without compromising on strength or light.

SEAMLESS GLASS RAILING

Precision in Glass. Strength in Design.

PRODUCT INTRODUCTION

Arcline delivers modern glass and aluminium solutions crafted for safety, durability, and refined aesthetics—built for homes, commercial spaces, and contemporary architecture. A frameless railing system designed to create open, floating spaces while meeting the highest safety standards.

- **Key Features:**
 - Minimal, frameless design
 - Clear panoramic visibility
 - Strong concealed fixing system
 - Ideal for balconies, staircases & terraces

SPECIFICATIONS

ALUMINIUM GLASS RAILING

Built Strong. Designed Smart.

Engineered using 606 TC Temper Aluminium, this system offers superior strength, corrosion resistance, and long-term performance.

- High-grade 606 TC temper aluminium
 - Weather & rust resistant
 - Compatible with toughened / laminated safety glass
 - Suitable for residential & commercial applications
- **Highlights:**
 - Premium materials
 - Clean architectural finish
 - Reliable performance
 - Low maintenance

SHOWER CUBICAL

Designed for Hygiene, Safety and styled for Modern Bathrooms.

PRODUCT INTRODUCTION

A shower enclosure is no longer a luxury—it’s an essential element of a modern bathroom. Designed to separate wet and dry zones, it enhances hygiene, improves safety, and elevates the overall bathroom aesthetic.

Why Shower cubical Matter:

- Keeps the bathroom dry, clean, and hygienic
- Reduces water spread and prevents slippery surfaces
- Creates a defined shower area without wasting space
- Adds elegance and structure to contemporary bathrooms

Modern bathrooms are planned around three zones—basin, WC, and shower. A well-designed cubical ensures optimal space utilization while maintaining comfort and functionality.

- **Key Features:**
 - Hygienic & Aesthetic
 - Spacious Design
 - Dry Bathroom Solution
 - Safety Glass Construction
 - Easy-Clean Surface
 - Ready-to-Use Installation

These enclosures are designed to fit standard bathroom layouts while delivering a clean, clutter-free look.

ARCLINE | FABRIC GLASS

Texture with Transparency.

PRODUCT INTRODUCTION

Fabric Glass brings together the strength of architectural glass with a refined fabric-inspired texture—adding depth, privacy, and visual interest without blocking light.

Why Arcline Fabric Glass

- Modern aesthetic with functional performance
- Seamlessly integrates with aluminum & glass systems
- Custom sizes and finishes available
- **Key Features:**
 - Distinctive textured / fabric-like finish
 - Allows light while offering visual privacy
 - Made with safety glass construction
 - Durable, low maintenance, and long-lasting

ARCLINE FABRIC GLASS
Where design feels as good as it looks

WHY CHOOSE US?

A CENTURY OF MASTERY

We leverage over 10 decades of carpentry heritage to provide unparalleled structural precision and time-tested expertise.

SOLUTION-DRIVEN ENGINEERING

We don't just sell windows; we provide bespoke, pre-engineered solutions tailored to meet complex architectural requirements.

TECHNICAL AUTHORITY

Our unique journey from hands-on trainees to master manufacturers ensures deep technical insight and precision in every project.

A LEGACY OF TRUST

We are committed to 100% customer satisfaction, building our reputation on excellence and the trust of premium referrals.
